InStat

ANALYTICAL SOLUTIONS
FOR ICE HOCKEY TEAMS

THE BEST CHOICE

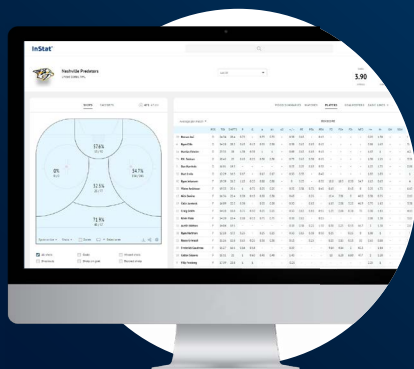

InStat possesses the biggest database of hockey statistics and game videos. We are covering all the professional leagues in Europe and North America: NHL, AHL, WHL, KHL, SHL, Allsvenskan, SM-liiga, Extraliga, NLA and many others.

Among our clients Stanley Cup finalists Washington Capitals and Vegas Golden Knights, Gagarin Cup champion Ak Bars, SKA, CSKA, HC Davos and Tappara.

BIG DATA

InStat company was established in 2007 and started with football analysis. Now there are more than 2000 InStat football clients all over the world. In 2015/2016 season InStat launched its hockey direction basing on the software and experience obtained in football.

INSTAT SCOUT

The most powerful and innovational tool for video analysis and scouting of the opponent, own performance, affiliate teams and prospects in development.

INSTAT SCOUT

InStat main product — video platform with advanced stats, clickable parameters, playlists and video of every episode from around the globe. Shots, faceoffs and goalie saves are visualized on unique charts.

InStat

ONLINE VIDEO ARCHIVE

Every parameter linked to the video. You can watch game episodes right from the shot chart, from stats table or from faceoff map. InStat Scout also provides ready-made playlist with typical game situations: counter-attack, power play, short handed play, positional attacks and so on.

The screenshot displays the InStat Scout interface for a Nashville Predators game. The main view is a video player showing a game episode. To the left of the video is a shot chart and a faceoff map. To the right is a stats table. A circular overlay highlights the 'VIDEO SUMMARIES' tab, which lists various game events: defense, counter-attack, performances, short handed play, Challenges, Tackles, Hits, Pass interceptions, Shots blocking, Entries, and Breakouts. The stats table shows the following data:

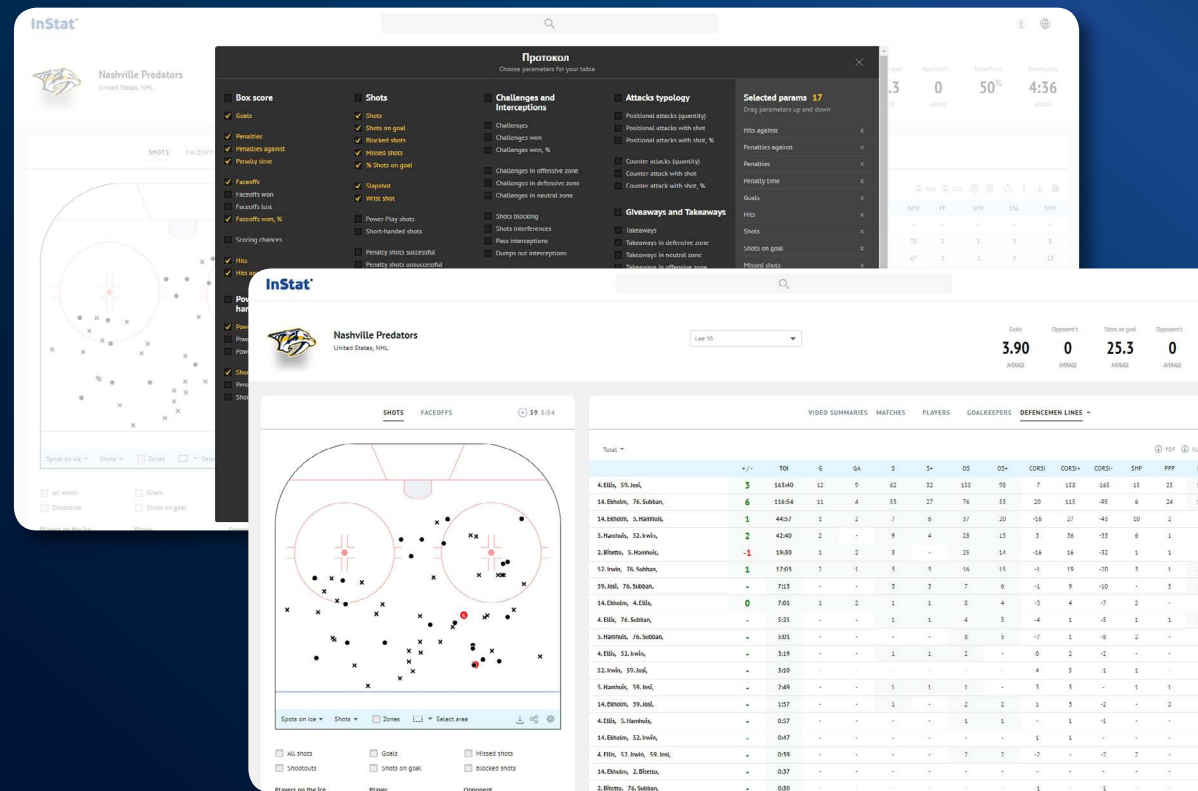

| Opponents... | Shots on goal | Opponents... | Faceoffs won... | Penalty time | |
|--------------|---------------|--------------|-----------------|--------------|---------|
| 3.90 | 0 | 25.3 | 0 | 50% | 4:36 |
| AVERAGE | AVERAGE | AVERAGE | AVERAGE | AVERAGE | AVERAGE |

The video player shows a game between the Nashville Predators (NSH) and the Chicago Blackhawks (CHI) at 3:37 in the 2nd period. The score is NSH 2, CHI 1. The video is titled 'POWER PLAY 09'.

CUSTOMIZABLE TABLES

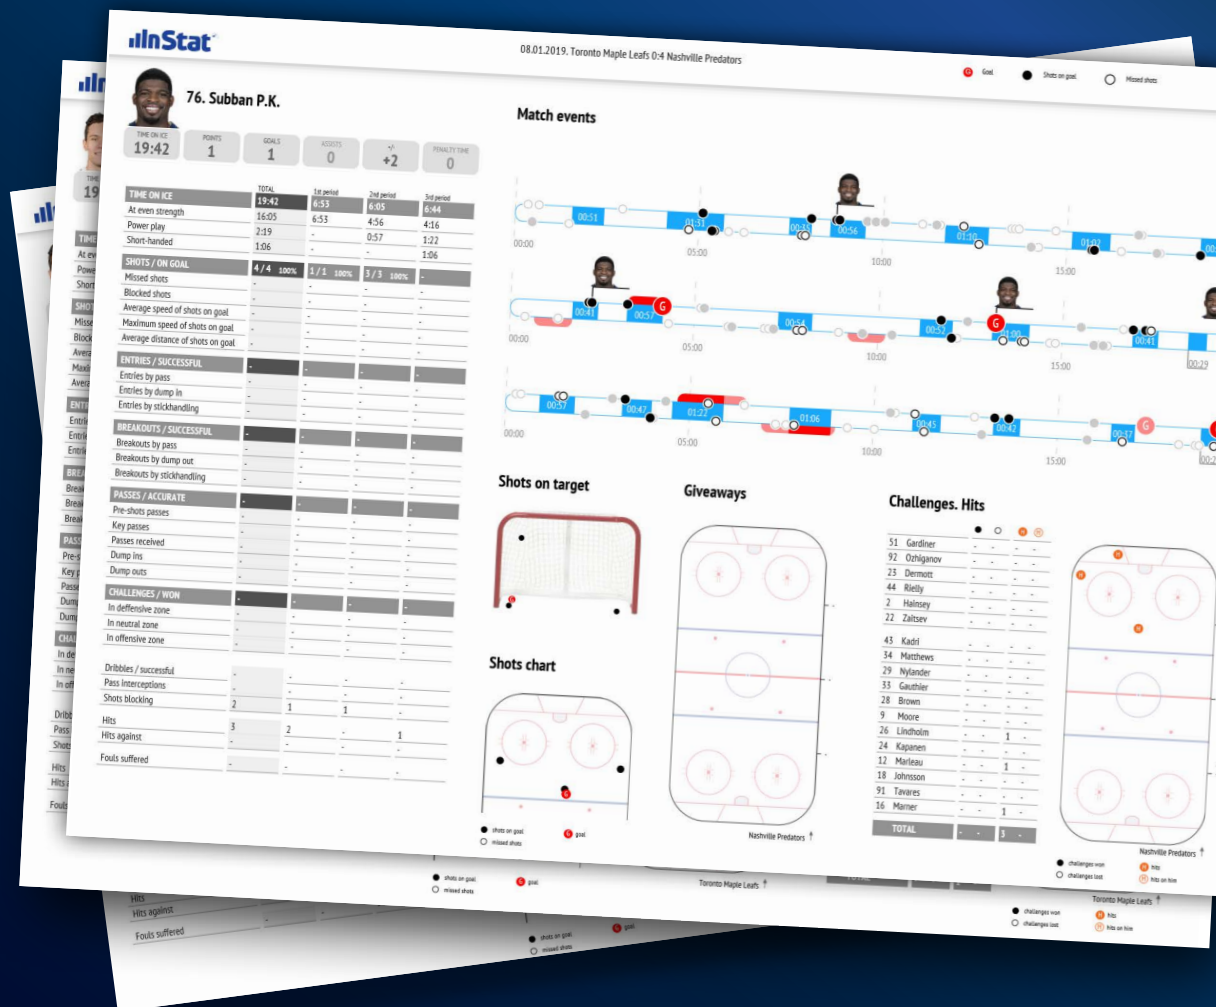

The games table features a large amount of stats. An InStat client can sort the data according to his needs, choose important parameters, filter by total or by average, export data in PDF and XLS.

InStat also offers statistics for basic lines, power play lines, penalty kill lines, defensemen and forwards.

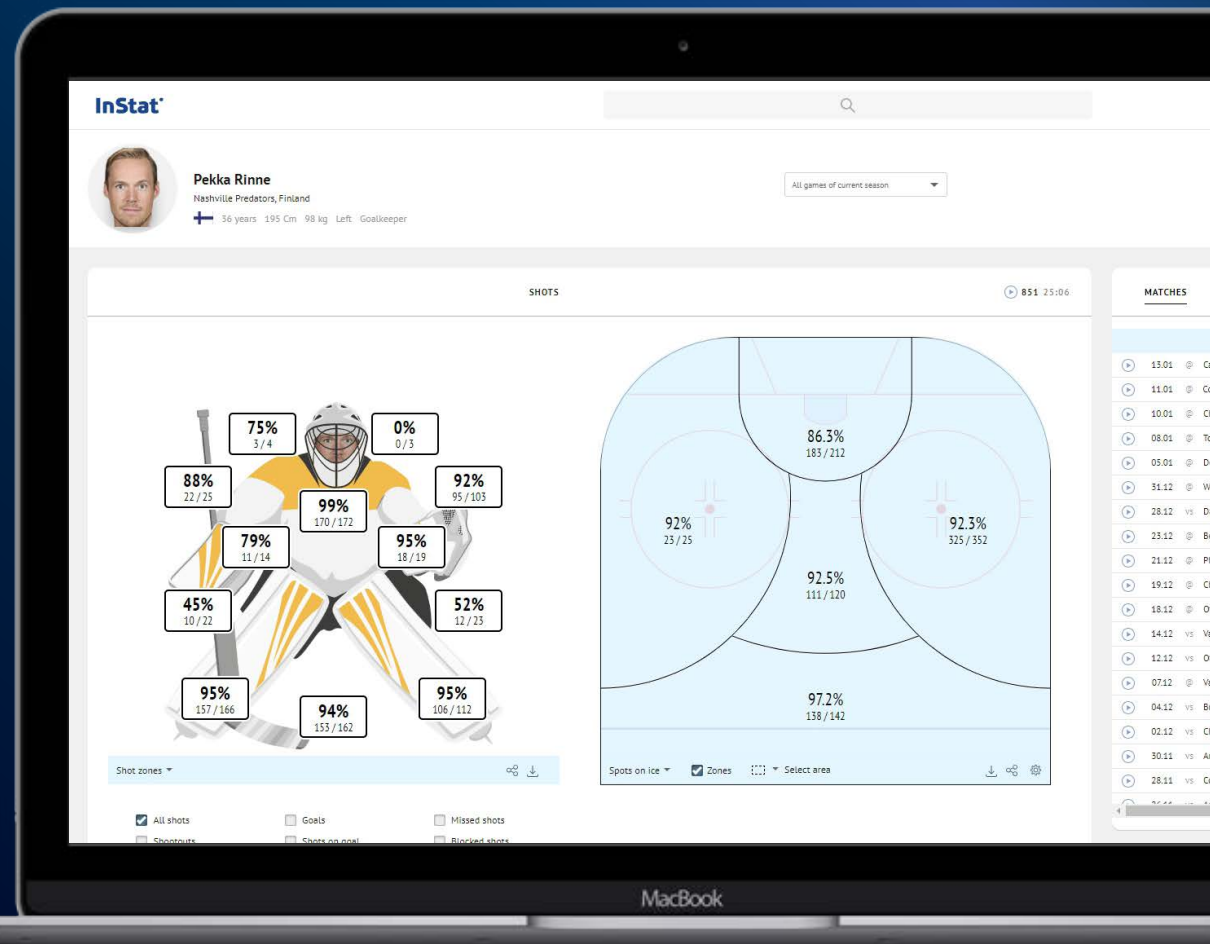

INSTAT REPORTS

Every player connected to our platform will receive his performance report after the game. No other company in the world considers as many statistical parameters as we do. Players can discover the accuracy of their passing, number of mistakes in different zones, track challenges and understand in which components of the game they need to improve.

GOALKEEPER PAGE

The goalkeeper's page on InStat Scout video platform features specific data for goaltenders. There is a body "map" available in addition to the ice hockey rink map, which shows how the goalkeeper made the saves and where exactly the opponents' shots were placed. Just as with every other statistical figure on InStat Scout video platform, each number is clickable and opens a video playlist with the selected episodes. Goalie-page is also featured in InStat Reports.

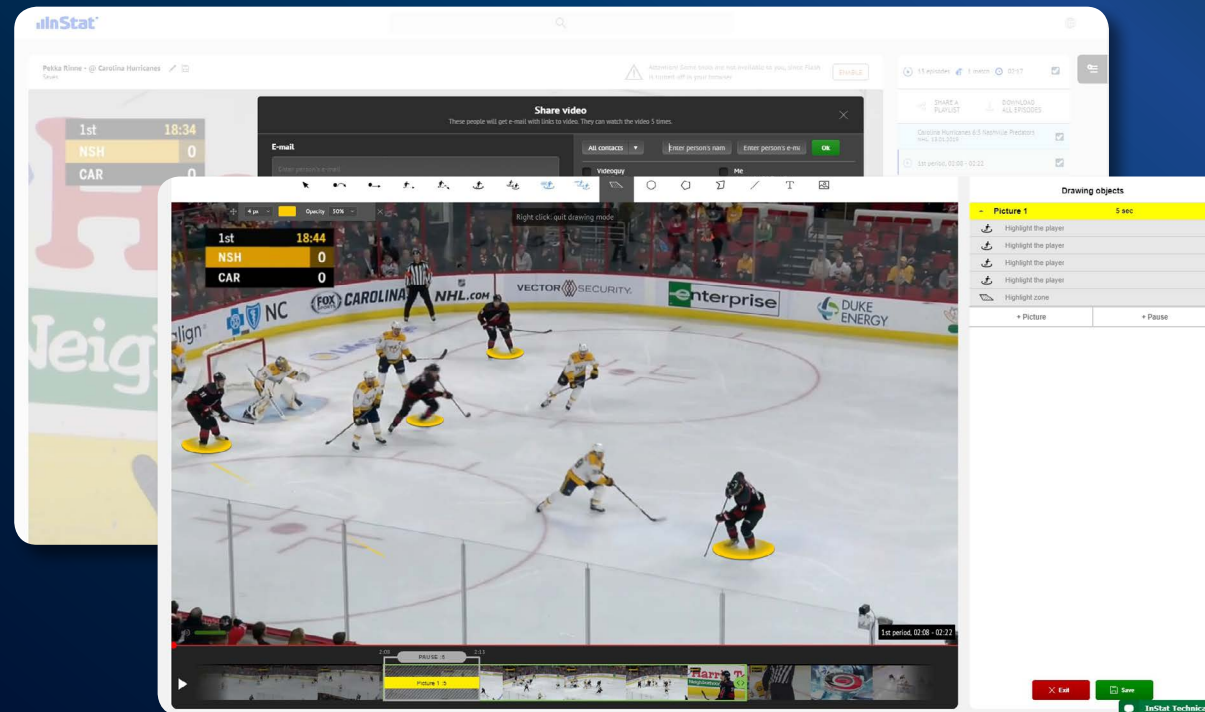

VIDEO TOOLS

Playlists — share and download.

InStat sharing system lets you select specific episodes (or choose all of them) and share them with any person, even with those, who don't have InStat Scout access.

Drawing — built-in video editor, which can be used to cut or expand the video episode borders, add drawings and comments right over the video. The added drawings and comments can be shared or downloaded just as a regular video to visually represent the ideas and deliver them to the players.
